PROLOGIS ESSENTIALS

For set up ease and smooth operations

WAREHOUSE ROBOTS

Effortlessly add, upgrade or integrate multi-bot systems into your warehouse workforce that can efficiently transform your picking, transport or fulfilment processes. Get the best out of people and cobots doubling, or even tripling fulfilment volumes without increasing labour or space in even the most demanding warehouse set ups.

EASE

Designed for pure logistics automation and to work collaboratively alongside people, our robot solutions are easily integrated into new and existing warehouse infrastructures without disrupting workflows.

PARTNERSHIP

Not only can you rely on us to guide you through operational innovation, but count on expert advice, support and consultancy every step of the way too. We'll also do the process lifting, keeping you informed and up to speed as we work to your deadlines.

SERVICE

No matter what your needs are – we will manage the whole process. Rely on dependable sourcing expertise, delivery guarantee and full order flexibility should anything change – we're here to help.
